

entraguard™ Telephone Entry Systems

The Entraguard Advantage

from

ENTRAGUARD sets the standard for high-performance telephone entry equipment. For over 25 years Marlee Electronics has been bringing you the best in quality and service. Keri Systems is an acknowledged leader in proximity card access control systems. Bringing Marlee's telephone entry systems into the Keri family provides Keri customers with an even greater portfolio of product solutions, and a future path for integrating the two products.

Features

The **Entraguard Advantage** combines both directory and entrance panel into one attractive and economical package. It utilizes the same high technology as the PM Series *plus*:

- Models available to dial from 25 to 1000 occupant telephones.
- Nonvolatile EEPROM permanent memory eliminates memory loss in the event of power interruption.
- Built-in pre-wired postal lock provision
- Multiple dialing patterns:
 - Local calls (optional 10 digit)
 - Long distance (11 digits)
 - PBX extension (Pattern must be specified)
- Accepts occupants rotary or touch tone phones.

- Dial out in touch tone, rotary or "automatic".
- Vandal and weather resistant 16 gauge steel construction.
- User-friendly push button front panel programming.
- Single digit LED display of all programming data.
- Superior "hands-free" speaker quality.
- Call duration programmable from 1 to 99 minutes.
- 4 programmable output relays available.
- Built-in "watch-dog" circuit to verify proper system operation.
- "Listen-in" capability allows customer to monitor the Entraguard location (hands-free unit only).
- Lighted directory display with lexan viewing screen.
- Optional add-on directory modules.
- Dual panel locks for optimal security.
- Remote programming via touch tone phone (optional).
- Entrakey® personal access codes.
- FCC registered.

Optional Features

- **RCP** - Remote Control Panel (for elevator control) 16 programmable relays.
- **ECP** - Expander Control Panel (for elevator control) 8 programmable relays.
- **NPL** - No Phone Line interface provides calling without a dedicated phone line.

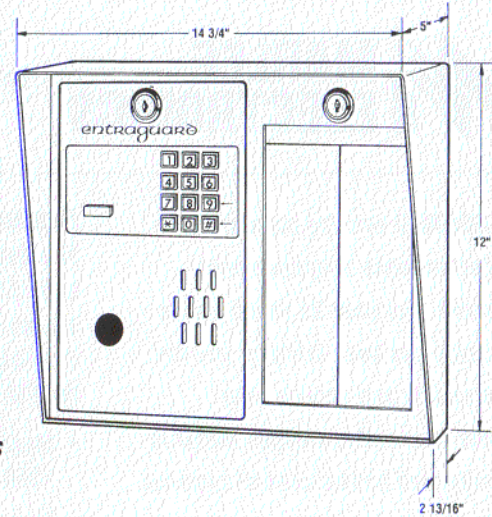

■ Choose our standard Entraguard Advantage handset model or our vandal resistant hands-free model.

HOW IT WORKS

Entraguard uses the regular telephone lines in an apartment, condominium, office building, or closed community to provide the occupants with communication, control and operation. Phone lines usually have excellent voice quality to assure positive identification of visitors, and using existing phone lines eliminates costly wiring.

Visitors select the occupants' code number (not the phone number) from a directory and dial that code. The **Entraguard** dials the actual phone number and connects with the occupant to permit a normal two-way phone conversation. To allow visitors entry, the occupant dials "9" on his phone to cause the **Entraguard** to activate the entry.

■ Entraguard Advantage Dimensions

Specifications

- Capacity: Up to 1000 tenants
- Outputs: (2) High Current Outputs, 3A, AC/DC, 5-30V; (2) Low Current Outputs, 150mA, AC/DC, 0-75V
- Postal Lock Provision
- Environmental:
 - Recommended operating temperature range: 0-100°F
 - Non-condensing at 95% Humidity
- Power consumption: 12 V AC, 1.5 A
- FCC Registration Number: AL 695Y-67614-OT-E
- Ringer Equivalence Number: 0.0B
- Complies with Part 68, FCC Rules

ENTRAGUARD ADVANTAGE MEMORY
