

Time and Attendance Terminals

KTA Series

- Integrates with Keri PXL-250/500 *Tiger Controller*-based access control system
- Built-in LCD Display for user time and date viewing
- Each unit can function as both T/A terminal and access controller
- Several reader options and combinations to choose from
- Can also use external reader technologies such as biometrics
- Software utility to allow export of event activity to virtually all T/A software packages
- Simple Time/Attendance reports provided in *Doors* software

Keri's **KTA Series** of Time and Attendance Terminals integrate with the PXL-250/500 **Tiger Controller** to provide the customer Integrated Access Control and Time/Attendance functionality on a single RS-485 network. The **Doors** software for access control contains some easy to use reports for basic T/A reporting, and by using Keri's export.exe event file export utility, more detailed reports, job cost accounting and payroll functions can be implemented by using virtually any 3rd party T/A software partner, including Keri's pre-qualified partners.

Each terminal, which contains a PXL-500 **Tiger Controller** (and optional SB-593 **Expansion Board**), can also function as an access controller, and is housed in an attractive powder coated aluminum enclosure that can include a surface-mounted MS-3000 or P-300H Proximity Reader (HID-compatible version). If customers wish to use the access system's readers instead of a terminal-mounted reader, any reader placed near a door can be connected to the Terminal and designated as an "in" or "out" reader for time/attendance reporting.

The terminal's front surface also has an LCD Display to give users a visual confirmation of what time they "clocked in" or "clocked out". By using the filtering capability in the export.exe utility, customers can import the access system data (typically "in" and "out" access events at the T/A terminals, along with any keypad-generated job costing events) into their T/A -Payroll software package for processing.

Time and Attendance Terminal

KTA Series

Specifications

Size

9.64"H x 8.84"W x 2.56"T
(245mm x 225mm x 65mm)

Weight

3.75 lbs. (1.70 kg)

Power Requirements

+12 VDC @ 225mA to 1A
(Depending upon SB-593 and Reader chosen)

Operating Environment

32°F to 140°F (0°C to 60°C)
10%-90% Humidity (non-condensing)
Indoor Use Only

Communication

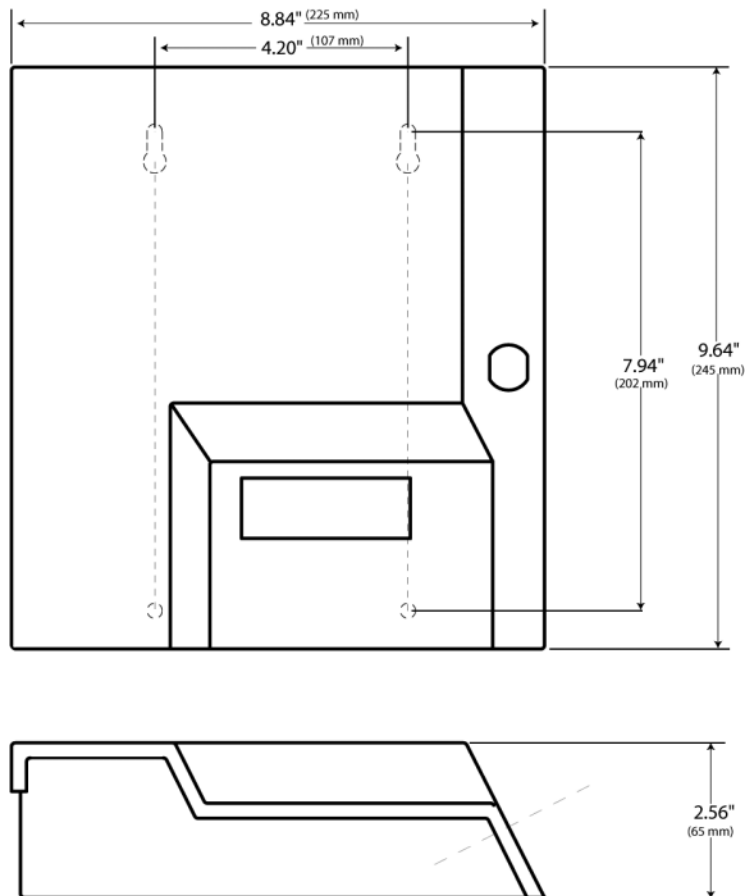

Between Terminals: RS-485, 9600 Baud
To PC: RS-232 Serial, Modem or TCP/IP

Buffer Capacity

19,110 Cardholders (if temporary users or dual verification is enabled)
65,000 Cardholders
3600 Events (selectable, with auto-download)

Material

Aluminum, Powder Coated Paint
