

Aperio™ Wireless Lock Technology

Brought to you by ASSA ABLOY Group brands:
ADAMS RITE | HES | MEDECO | SARGENT

The global leader in door opening solutions

Easily and economically control any opening in your facility, using a combination of wired TCP/IP-based NXT Controllers from Keri Systems and Aperio wireless locks from ASSA ABLOY Group brands.

Doors.NET software allows you to configure and manage Keri's NXT hardware and Aperio locks, as well as brings in a host of great features to make your facility more secure and easier to manage.

- Keep watch on your facility with integrated video that can even provide a positive impact and ROI by reducing employees' tardy behavior
- Powerful access control feature set means the system will meet your requirements, with the flexibility to easily customize it to perfectly suit your facility
- Intuitive interface with lots of right-click menus for fast and smooth operation and control
- Reports "on the fly", trace, sortable grids and many other conveniences put information instantly at your fingertips

Aperio is a global wireless solution, available in a range of lock types to support various types of openings as well as local requirements in regions throughout the world

Aperio™ Wireless Lock Technology

Available in a variety of locking solutions from ASSA ABLOY Group brands, Aperio is a global wireless platform that allows you to increase security – quickly, easily, and affordably. It uses local wireless communication between an Aperio lock and hub to connect to an access control system, eliminating the greatest cost and inconvenience of traditional access control – the wiring at the door.

Aperio Features

- Utilizes IEEE 802.15.4 wireless communication between the lock and an Aperio hub that is connected to Doors.net
- Real-time communication with Doors.net for greater security and control
- Real-time door status monitoring
- Advanced data security with standard encryption techniques
- AES 128-bit encryption
- Global wireless platform that addresses a wide range of security requirements
- ANSI/BHMA Grade 1 hardware, offering the highest degree of physical security available in access control locks
- Supports HID® 125 kHz proximity or 13.56 MHz iCLASS® (full authentication, all formats) credentials

Doors.NET puts the power of Keri hardware and Aperio wireless locks at your fingertips.
