

Doors.NET, our most advanced software platform originally designed for NXT hardware, now supports PXL-500 Controllers. This gives PXL customers currently using Doors32 software the opportunity to [upgrade their systems](#), get more value from a host of new features, and extend the life of their system for years to come.

What are the important benefits the customers will see:

Immediate Return on Investment - HR Reporting with Video integration can curtail lost employee productivity

Based on Microsoft.Net and SQL – Designed for the future, with speed and security in mind

Multiple Concurrent Operators and Sites – No need to connect with sites one at a time, plus the ability to partition operator privileges according to sites

Integrated Video – Connect many popular IP cameras directly for video monitoring, recording, searching and viewing

Usability – Right click commands, hardware tree navigation and simplified screens let you manage the system quickly and efficiently

Alarm Management – Set priorities, require operator responses, and provide instructions so that customers are immediately notified and can manage critical events

Screen Customization – Let individual operators configure the desktop the way they prefer for maximum efficiency

Email and SMS Messaging – Remotely notify those who need to know of important events

Windows 8 – Makes your system future-proof because Windows 8 compatibility is built in*

*Note – Doors32 will not be Windows 8-compatible, so please keep that in mind for current and future PXL customers
