

NXT RIM Firmware v03.01.06

Release Notes

Section 1 - Reader Interface Module (RIM) Firmware Release

Section 2 - Known Issues

Section 3 - Compatibility

Section 4 - Contact Keri Systems

1.0 Reader Interface Module (RIM) Firmware Release

Release of the NXT RIM firmware v03.01.06 contains the following enhancement/fix:

1. When using an HID/AWID Wiegand reader with single line control, the pulsing of the LED to switch between the red LED and green LED to produce an amber LED would tie up the reader processor resulting in a loss of read range and/or misreads. The RIM firmware has been changed to include an additional LED control mode which, when set, will send LED control to HID/AWID Wiegand readers for red or green LED only (no amber LED).

2.0 Known Issues

The NXT RIM firmware v03.01.06 has no known issues.

3.0 Compatibility

NXT RIM units with firmware v03.01.06 is ONLY compatible with the following:

DoorsNXT - Software v2.3.0 or greater

NXT Controllers - Firmware v02.03.03 or greater

NXT-4x4 - Firmware v02.02.05 or greater

NXT Readers - Firmware v02.00.01 or greater

NXT RIMs are compatible with MS readers, 26-Bit Wiegand readers, non-26-Bit Wiegand readers, and HID readers.
